Enthusiastic and detail-oriented web developer with strong skills in HTML, CSS, JavaScript, Python, and Bootstrap. Passionate about creating responsive, user-friendly websites and eager to contribute fresh ideas and technical expertise to a dynamic team."

PROFESSIONAL SKILLS

Design Understanding
Team Collaboration

Problem Solving Visual
Design dashboard

TECHNICAL SKILLS

Java script, Python , HTML, CSS,
MySQL, C, C++, Bootstrap ,java, react

PROJECTS

Hospital Management System

I created a modern, dark-themed Hospital Management System using HTML, CSS, JavaScript, and Bootstrap, designed with a strong focus on intuitive design, smooth navigation, and smart functionality. This project offers a seamless user experience across all devices, includes advanced features like dynamic dashboards and appointment management, and introduces a unique emergency contact section where patients can record and send voice messages instantly, making it truly innovative and user-centered."

Contact Book application

Developed a Python-based Contact Book application with features to add, view, search, and delete contacts using a command-line interface, focusing on file handling, input validation, and robust error management for a smooth user experience.

NETFLIX

Developed an interactive Power BI dashboard for Netflix data analysis, visualizing key metrics such as user engagement, subscription trends, and content performance. Delivered clear, data-driven insights to support strategic decisions on content planning and audience targeting.

EDUCATION

Bachelor of Computer Application

Sahyog college of IT and Management, Thane Maharashtra , SGPA: 9.5
Completed key projects using Python, Java Script.

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi.
